CHAPTER 8

PARTS ORDER INSTRUCTIONS AND PARTS LIST

FURNISH COMPLETE INFORMATION WHEN ORDERING PARTS — When ordering parts for your boiler, be sure to include on your order the boiler serial number shown on the name plate attached to the front head. Your order should state the Cleaver-Brooks part number, the name and description of the part required, the quantity desired, and method of shipment. Indicate date material is required. If repair parts are required for accessory equipment, such an electric motor, pump, etc., which may not be shown, be sure to give the complete name plate data from the item for which the parts are required.

WHERE TO ORDER PARTS — Repair or replacement parts should be ordered from your Cleaver-Brooks representative or from Cleaver-Brooks, Division of Aqua-Chem, Inc. 1500 Lehman St., Lebanon, Pennsylvania 17042.

RETURNING PARTS FOR REPAIR — Parts to be repaired should be directed to your Cleaver-Brooks representative, or to Cleaver-Brooks Parts Center, 1500 Lehman St. Rear, Lebanon, PA 17042. A purchase order or a letter authorizing repairs and giving complete details should be mailed to your representative or to

Cleaver-Brooks Parts Department, in Lebanon, PA. Prior to returning, please remove fittings or accessories from the component, properly drain and clean part to comply with shipping regulations and include inside of the package a packing slip identifying the part with your company's name.

If you desire to return parts for reasons other than repair or exchange, please contract your representative or the Lebanon Parts Department and state the reasons for the return and await permission and directions prior to returning the material.

Many controls and other components can be factoryrebuilt (FR) or have a trade-in value. These items are available on an exchange basis. Consult your Cleaver-Brooks representative or the Lebanon Parts Department for information and prices.

Be sure to show the serial nmber of your unit on all parts orders and correspondence.

Notes On Usage References

Blank Indicates item applicable to all sizes, fuels and pressures covered by this manual. LP Indicates Low Pressure Design Boiler (ASME Code Section IV) e.g. 15 lb. Steam Boiler. (also see Hot Water) HP Used alone, indicates High Pressure — see Power. Indicates Horsepower when following a boiler size. HW Hot Water Boiler. Standard ratings are 30, 60, 125 and 150 lb. The 150 lb. is built to the ASME Power Boiler Code (ASME Sect. I). The others are built to Code Sect. IV. Indicates Power Boiler Design (ASME Code Sect. I). Steam boilers above 15 Power lb. design are classed as Power Boilers. Standard ratings are 150, 200 and 250
